**QUESTION 1**

A BPM application developer is building client side human services including custom coach views for inclusion in a set of business process definitions (BPDs). The BPM application developer tests the business processes using the process

designer inspector. One of the human services is not working as expected and it is suspected that the JavaScript in the custom coach views is at fault.

Which of the following debugging tools can the BPM application developer use to diagnose the problem?

- A. BPM service debugger
- B. BPM process inspector
- C. Process admin inspector
- D. Browser debugger features

Correct Answer: D

QUESTION 2

A company that operates in multiple countries plans to build a human resources process that needs to support multiple languages. The BPM Application developer assigned to the project knows that it will be necessary to create a localization

resource in the process application that will contain a set of localization keys, the list of languages to support and translations in each language for each key.

In addition to the coach view label, which of the following components of the process application can the BPM application developer configure to support multiple languages?

- A. Team name, process instance name, and coach view hover help.
- B. Team name, task subject, and coach view configuration option label.
- C. Process instance name, task subject, and coach view configuration option label.
- D. Coach view hover help, coach view configuration option group field, and coach view configuration option label.

Correct Answer: D

QUESTION 3

A BPM application developer needs to create a custom dashboard to show the maximum, minimum and average sales in the last 12 months. Only the sales managers can view the data in the dashboard in the process portal. In the exposure section of the custom dashboard, which setting must the application developer set for the sales manager to view the data?

- A. Set the "Expose to" field to Sales Managers.
- B. Set the "Expose to start" field to Sales Managers.

C. Set the "Expose Business Data" field to Sales Managers.

D. Set the "Expose Performance Metrics" field to Sales Managers.

Correct Answer: A

QUESTION 4

After deploying a new snapshot and migrating in-flight instances to the new snapshot, a BPM application developer has found some instances with orphaned tokens. Which API must the BPM application developer use to manage the orphaned tokens?

A. Java

B. REST

C. JavaScript

D. Web Services

Correct Answer: B

QUESTION 5

A multinational corporation requires their coaches to be translated into the users' native language. A BPM application developer has not provided translations for all the languages. What must the BPM application developer do to handle situations

where a user's selected language is not supported and a default is required?

To designate the default label, the BPM application developer must create:

A. a coach view configuration option for the default label

B. a localization resource with a default local key, and create a default local value

C. a key-value pair list local variable and set the label to the default local key in the user's browser

D. a default label using an environment variable and set it to the default language in the user's active directory profile

Correct Answer: C
