**QUESTION 1**

ABPM application developer needs to collect some business information and create a trackini group for the following business process definition (BPD).

The BPM application developer adds a trackini point to the BPD and associates some process variables to this group:

Intermediate Event Details

Tracking

Tracking Properties

ProcessOrderQuestion
r1a169a140c7f2a41

<input checked="" type="checkbox"/> orderDate (datetime)	tw.local.order.date
<input checked="" type="checkbox"/> orderID (string)	tw.local.order.id
<input type="checkbox"/> amount (number)	

After running some tests, the BPM application developer notices that information defined in the trackini properties is not collected in the performance data warehouse after the instance is completed. What should the BPM application developer do to fix the problem?

- A. Set "Enable Trackini" and "Enable Auto-trackini" in the BPD.
- B. Set "Enable Trackini" in the BPD and then update trackini definitions.
- C. Set "Enable Trackini" and "Enable Auto-trackini" in the BPD and then update trackini definitions.
- D. Associate a process variable to the amount field in "Trackini Properties" and update trackini definitions.

Correct Answer: A

QUESTION 2

How are the 3 editions, Express, Standard and Advanced, of IBM Business Process Manager V8.5.5 differentiated? (choose 2)

- A. Advanced Edition has built in ESB and SOA capabilities.
- B. Standard Edition and Advanced Edition support BPEL and BPMN.
- C. Express Edition and Standard Edition support load balancing.
- D. Express Edition is limited in number of cores and number of users.
- E. Express Edition and Standard Edition support Intel and Power Platforms.

Correct Answer: CD

QUESTION 3

Which component stores process performance data?

- A. Process Center
- B. Process Server Database
- C. Performance Database
- D. Performance Data Warehouse

Correct Answer: D

QUESTION 4

A BPM application developer needs to create a custom dashboard to show the maximum, minimum and average sales in the last 12 months. Only the sales managers can view the data in the dashboard in the process portal. In the exposure section of the custom dashboard, which setting must the application developer set for the sales manager to view the data?

- A. Set the "Expose to" field to Sales Managers.
- B. Set the "Expose to start" field to Sales Managers.
- C. Set the "Expose Business Data" field to Sales Managers.
- D. Set the "Expose Performance Metrics" field to Sales Managers.

Correct Answer: A

QUESTION 5

A BPM Application developer needs to construct an integration service that will access an external web service. The web service has been predefined in the process application settings. The BPM application developer creates a new integration

service and adds a web service integration to the canvas. Since this is a predefined web service, on the implementation tab, the BPM application developer selects "From process application settings" for the discovery scheme.

What should be the next step in configuring the web service connector using the predefined server for the BPM application developer?

- A. Insert the URL and use the "Discover" button.
- B. Fill in the data mapping tab in the web service properties.
- C. Select the defined web service and select which operation to use.
- D. Generate the data types that will be inputs and outputs for the web service.

Correct Answer: C
