- A. Pure
- B. Static
- C. Relative
- D. Absolute
- E. Dynamic
- F. Sampled

Correct Answer: CDE

QUESTION 2

Which statement is correct regarding the Hub Tivoli Enterprise Monitoring Server (TEMS) in an IBM Tivoli Monitoring V6.3 environment?

- A. There can only be one active Hub TEMS in each environment.
- B. There can be more than one active Hub TEMS in each environment.
- C. The number of needed Hub TEMS is determined by an updated file during installation.
- D. The number of needed Hub TEMS is dependent on the number of active links to agents.

Correct Answer: A

QUESTION 3

What is the difference between a situation and a policy when using the Take Action option?

- A. Take Action in a situation can write to the Universal Message Log, while Take Action in a policy can only issue a command.
- B. Take Action in a situation uses the system administrator ID, and within a policy the User ID that created the policy will be used when executing the Take Action.
- C. Take Action in a situation will only issue the command at the Managed System (agent) where the situation became true, while Take Action in a policy can be executed at any managed system.
- D. Take Action in a situation can be issued at the Managed System Tivoli Enterprise Monitoring Server, while in a policy the Take Action can be issued at the Hub Tivoli Enterprise Monitoring Server.

Correct Answer: D

QUESTION 4

How can it be determined if the Warehouse Proxy agent (WPA) is processing data?

- A. Log on to the Tivoli Enterprise Portal Server (TEPS) and check the Common Event Console.
- B. Log on to the TEPS and look at the WPA workspaces.
- C. Log in to the system where the WPA is installed and check that the WPA process is running.
- D. Use a database client to access the Tivoli Data Warehouse database directly and verify metric data is being written to the database.

Correct Answer: B

QUESTION 5
