**QUESTION 1**

By which application you do Evaluate the reliability of your target data based on the validation rules you created in your batch jobs. Quickly review, assess, and identify potential inconsistencies or errors in source data?

- A. Administrator
- B. Impact and Lineage Analysis
- C. Operational Dashboard
- D. Data Validation Dashboard
- E. Auto Documentation
- F. Data Quality Reports

Correct Answer: D

QUESTION 2

In the Alpha Acquisitions database, the country for a customer is stored in a separate table and referenced with a code. To speed up access to information in the data warehouse, this lookup should be eliminated.

Use the lookup_ext function to exchange the ID for the country name in the customers table for Alpha with the actual value from the country table.

How to In the Alpha_NACustomer_DF workspace, delete an existing expression for the Country column in the Query transform.

- A. In the Mapping tab, choose Functions.
- B. In the Select Function dialog box, choose Lookup Functions.
- C. the Alpha_NACustomer_DF workspace, to open the transform editor, double click the Query transform.
- D. In the Query Editor, in the output schema, choose the field Country.
- E. In the Mapping tab for the Country field, delete the existing expression.

Correct Answer: CDE

QUESTION 3

Your customer has rules requiring that each row in the source be tested for certain criteria in a specific order. When a row passes one criteria, it should NOT be tested for the next criteria.

How should this be implemented using SAP Data Services transforms? Please choose the correct answer.

- A. Use multiple Query transforms with one WHERE? clause per rule. Connect all queries to the source.
- B. Use a Case transform with the Row Can Be True for One Case Only and Preserve Expression Order options enabled.
- C. Use a Case transform with the Produce Default Output with Label option enabled, and enable the Preserve Expression Order checkbox.
- D. Use a Validation transform and add the rules in the proper order for each single column.

Correct Answer: B

QUESTION 4

Management Console is written in which language?

- A. XML
- B. .net
- C. Html
- D. Java

Correct Answer: D

QUESTION 5
