QUESTION 1

What does assigning the Logical Group (SOD-LOG) type to a connector group allow you to do?

- A. Run a cross-system analysis.
- B. Use the connector group for transports to the target system.
- C. Monitor the target system.
- D. Use the connector group as a business role management landscape.

Correct Answer: D

QUESTION 2

Which type of user account does an emergency access user need to log on to a Firefighter session using transaction GRAC_SPM?

- A. A user account in the User Management Engine (UME)
- B. A user account in the Access Control system
- C. A user account in the LDAP system
- D. A user account in the target system

Correct Answer: B

QUESTION 3

For which of the following scenarios would you activate the end-user logon function?

- A. A user has no access to the Access Control system and needs to submit a request for access.
- B. A user has been promoted to manager and needs to log on to the Access Control system to approve a pending request.
- C. A user has successfully completed validation testing.
- D. A user has signed a non-disclosure agreement (NDA).

Correct Answer: A

QUESTION 4

Which indirect provisioning types are supported in user provisioning? (Choose three)

- A. Organization Type
- B. Job
- C. Position
- D. Holder
- E. User

Correct Answer: ABC

QUESTION 5

You want to create a connector to an SAP ERP client. You must therefore define the technical parameters for the Remote Function Call (RFC) destination. What does SAP recommend regarding the name of the RFC destination?

- A. The RFC destination name must begin with the prefix "GRC".
- B. The RFC destination name must be the same as the logical system name.
- C. The RFC destination name must include the installation number of the destination system.
- D. The RFC destination name must include the IP address of the target destination.

Correct Answer: B
