- B. The number of data sets processed in each step
- C. The processors of the process steps
- D. The number of rollbacks for process steps
- E. The details when the configuration was changed

Correct Answer: ABE

QUESTION 2

Your customer uses SAP Master Data Governance in a co-deployment scenario with NO additional target systems for the governed master data. Financial data is NOT included.

What are the advantages?

There are 2 correct answers to this question.

- A. Customizing synchronization is NOT required
- B. Change request configuration effort is reduced
- C. Data Replication configuration and monitoring is NOT required
- D. Additional authorization concept is NOT required

Correct Answer: AC

QUESTION 3

As the figure, Duplicate Check ?Configuration, shows, in this Customizing activity, you configure the duplicate check for an entity type. On the basis of a data model (for example BP or MM) you define which search mode the system must use and which thresholds (in percentages) are to apply, which of the meets of criteria?

- A. Records with a matching score lower than the low threshold are not regarded as duplicates.
- B. Records with a matching score between the defined low and high thresholds are regarded as potential duplicates.
- C. Records with a matching score higher than the high threshold are not allowed by the system, because they are regarded as duplicates.
- D. None of the above.

Correct Answer: ABC

QUESTION 4

Why does SAP recommend to synchronize SAP ERP customizing settings (reference data) between the SAP Master Data Governance (MDG) system and the target system(s)?

There are 2 correct answers to this question

- A. If reference data only exists in the SAP MDG system, this reference data CANNOT be chosen within the SAP MDG change request processing
- B. If reference data only exists in the SAP MDG system, the replication to the target system(s) can fail
- C. If reference data only exists in the target system, this reference data CANNOT be chosen within the SAP MDG change request processing
- D. If reference data only exists in the target system, the corresponding attributes are automatically removed from the governance scope

Correct Answer: AD

QUESTION 5

Your customer is using internal number assignment.

When is a temporary ID assigned for SAP Master Data Governance for Material during material creation in a single-object change request?

Please choose the correct answer.

- A. During the material creation process until the material group of the materials maintained
- B. During the material creation process until all mandatory fields of the material are maintained
- C. During the material creation process until the material is saved/submitted
