QUESTION 1

A training data file for time series must contain at least two columns: Note: There are 2 correct answers to this question.

A. The date column,

B. The signal column

C. The server port

Correct Answer: AB

QUESTION 2

Note: There are 4 correct answers to this question.

A. the apply-in dataset (able, view, select statement, data manipulation) and the results dataset are tables coming from the same database

B. the model has been computed while at least one physical key variable was defined in the application

C. no error has occurred

D. A web server such as Apache Web Server or Windows Internet Information Services (IIS)

E. the in-database apply mode is not deactivated

F. granted access to read and write (create table)

Correct Answer: ABDE

QUESTION 3

A table of data is a dataset presented in the form of a two-dimensional table. In this table: Note: There are 3 correct answers to this question.

A. Each row represents an observation to be processed, such as "American individual" in the sample file Census01.csv .

B. Each column represents a variable that describes observations, such as the "age" or the "gender" of individual Americans.

C. Each cell, the intersection of a column and a row, represents the value of the variable in the column, for the observation in that row

D. Both of these ports must be accessible from the client machine. For example, network firewalls should allow communication on these ports between client machine and the servers.

Correct Answer: ABC

QUESTION 4

The Periodic with testing at the end strategy distributes:

Note: There are 4 correct answers to this question.

A. Three lines of the first 4/5 of the initial dataset are distributed to the training subset.

B. One line of the first 4/5 of the initial dataset is distributed to the validation sub-set.

C. If the entire 4/5 of the initial dataset is not yet distributed, distribution operations begin again at step 1. Otherwise, if the entire 4/5 of the initial dataset has been

D. distributed, distribution operations go to step

E. The final 1/5 of the initial dataset is sent as a block of data to the testing sub-set.

F. The name server and the server will be assigned a specific TCP port. By default, the startup scripts we use fix them, and they should probably set properly depending on the network strategy

Correct Answer: ABCD

QUESTION 5

What type of join is generated when creating Analytical Data Set and Data Manipulation from the Data Manager?

Note: There are 1 correct answers to this question.

A. Inner join

B. Right outer join

C. Cross join (Cartesian product)

D. Left outer join

Correct Answer: B
