- B. SAP TM charge type to SAP ERP service material group
- C. SAP TM charge type to SAP ERP service master
- D. SAP TM charge category to SAP ERP G/L account

Correct Answer: AC

---

**QUESTION 4**

Integration of SAP ERP orders and deliveries facilitates transportation planning and execution in SAP TM based on orders and deliveries created in an SAP ERP system. The orders and deliveries are represented by transportation requirements in SAP TM. Integration with SAP ERP enables you to:

There are 4 correct answers to this question.

- A. Perform tendering, subcontracting, and execution in SAP TM based on SAP ERP orders before delivery creation.
- B. Propose and create deliveries based on dates and quantities according to transportation planning results. This takes into account transportation constraints such as resource availability and transportation durations.
- C. Sales Organization
- D. Collectively plan transportation for all orders and across order types.
- E. Perform transportation planning in SAP TM based on SAP ERP orders before delivery creation. This forecasts transportation and resource demands.

Correct Answer: ABDE

---

#### QUESTION 5

The master data in SAP TM can be described as a transportation network. To support proper transportation planning and execution, several master data elements are needed.

When combined, these elements outline a transportation network comprised of the following elements: There are 4 correct answers to this question.

- A. Locations (customers, vendors, plants, shipping points, ports, airports, hubs,...)
- B. Schedules
- C. Transportation zones and zone hierarchies
- D. Transportation lanes
- E. Shipping Condition

Correct Answer: ABCD
