**QUESTION 1**

Which of the following statements regarding the communication between a SAP system and an external Message Transfer Agent (MTA) using SMTP are correct?

- A. The SAP NetWeaver AS ABAP can send mails to only one specific MTA per SAP client.
- B. The SAP NetWeaver AS ABAP cannot automatically forward incoming mails to other domains.
- C. The SAP NetWeaver AS ABAP provides the full functionality of a Message Transfer Agent (MTA).
- D. To send e-mails to an MTA, or to receive emails from an MTA using SMTP, the SAP NetWeaver AS ABAP must have the ST-MAIL plugin, which needs to be installed using transaction SAINT.

Correct Answer: AB

---

**QUESTION 2**

The Integrated Log Viewer is presented as a service of SAP NetWeaver AS Java. It provides runtime control for working with log messages. Which of the following statements about the Integrated Log Viewer is true?

- A. Log Viewer is the right tool for setting and modifying Severity levels.
- B. The Integrated Log Viewer provides options for log and trace configuration. You can add new locations and categories and change the configuration of the existing ones.
- C. The Integrated Log Viewer can merge logs within an SAP NetWeaver AS Java instance.

Correct Answer: C

---

**QUESTION 3**

Which statement regarding remote printing with SAP NetWeaver AS ABAP is correct?

- A. If you want to configure remote printing for an output device, you need to choose access method C for Windows operating systems.
- B. If you want to configure remote printing for an output device, you have to choose access method R in every case (on all operating systems).
- C. If you want to configure remote printing for an output device, you can use access methods U and S, depending on your operating system.

Correct Answer: C

---

**QUESTION 4**

When the transaction log of the SAP database becomes full, no changes to data in this database can be performed. Which action can be taken to resolve this problem? (Choose three)

- A. As the first step, analyze the ABAP short dump generated when the transaction log becomes full.
- B. Set the recovery model to simple.
- C. Terminate long-running transactions and backup the transaction log.
- D. Perform an immediate backup of the transaction log.
- E. When the administrator wants to resolve the problem by extending the existing transaction log, but it cannot be extended on its volume due to an exhausted disk space, then he/she must set the database offline, create an additional transaction log file on another drive, and set the database back to online.

Correct Answer: BCD

---

#### QUESTION 5

Which ABAP software components are installed during the installation of an SAP ECC 6.0 system? You find those in System -> Status of your SAP ECC 6.0 system. (Choose two)

- A. SAP\_APPL
- B. SAP\_CRM
- C. SAP\_HR

Correct Answer: AC
