**QUESTION 1**

By implementing the Central User Administration (CUA), you can maintain some of the following information centrally for all clients connected to the CUA. Which information can be maintained centrally?

- A. Complete definitions of "User Roles"
- B. Which user is allowed to logon to what client
- C. The definition of authorization profiles
- D. Initial (new) passwords
- E. The lock status of users

Correct Answer: BDE

QUESTION 2

When the transaction log of the SAP database becomes full, no changes to data in this database can be performed. Which action can be taken to resolve this problem? (Choose three)

- A. As the first step, analyze the ABAP short dump generated when the transaction log becomes full.
- B. Set the recovery model to simple.
- C. Terminate long-running transactions and backup the transaction log.
- D. Perform an immediate backup of the transaction log.
- E. When the administrator wants to resolve the problem by extending the existing transaction log, but it cannot be extended on its volume due to an exhausted disk space, then he/she must set the database offline, create an additional transaction log file on another drive, and set the database back to online.

Correct Answer: BCD

QUESTION 3

Which of the following statements regarding the client concept and the client copy tools in ABAP- based SAP Systems (for example, SAP ECC) are true? (Choose three)

- A. Application data can only be copied from one client to another, when all client-specific customizing is also copied.
- B. Clients can be copied between SAP Systems of the same release.
- C. Client-independent customizing is always automatically copied between clients.
- D. User master records cannot be copied between clients.
- E. Clients can be copied within a single SAP System.

Correct Answer: ABE

QUESTION 4

Which of the following statements regarding the transaction RZ10 are true? (Choose two)

- A. When you use the save button in RZ10 and activate the profile, it will be written immediately to the operating system level.
- B. You can compare the profile file on the operating system with the profile in the database.
- C. The default profile cannot be maintained using transaction RZ10.
- D. The maintained parameters will take effect immediately after the profile is activated in the RZ10.

Correct Answer: AB

QUESTION 5

Which of the following functions are offered by CCMS-based monitoring (transaction RZ20)?

- A. Monitoring different attributes of all instances of one SAP system using a single monitor.
- B. By default, all alerts in transaction RZ20 generate corresponding mail notifications.
- C. Monitoring different attributes of different SAP systems using a single monitor.

Correct Answer: AC
