### QUESTION 1

Which of the following statements regarding refreshing mode in BEx Analyzer is correct?

- A. The "pause automatic refresh" option should only be used when you perform ad hoc analysis directly against an InfoProvider.
- B. The "pause automatic refresh" option is the best practice option. You only use the "automatic refresh" option for special scenarios to optimize the use of the OLAP processor.
- C. The "automatic refresh" option is the best practice option. You only use the "pause automatic refresh" if you want to define more than one filter and send them all to the OLAP processor.
- D. The "pause automatic refresh" option prevents automatic data refreshes when you report against VirtualProviders with real-time data access.

Correct Answer: C

---

### QUESTION 2

Which of the following InfoProviders store data persistently?(Choose three)

- A. InfoCubes
- B. InfoSets
- C. InfoObjects
- D. DataStore Objects
- E. MultiProviders

Correct Answer: ACD

---

### QUESTION 3

What is the purpose of a dashboard model created in Dashboard Design?

- A. To monitor access to data based on SAP roles
- B. To analyze data elements commonly used in many different reports
- C. To display thousands of rows of data in a report
- D. To display highly aggregated visualizations of current business performance

Correct Answer: D

---

### QUESTION 4

You create a workbook with exceptions in BEx Analyzer. Your customer does not like the standard colors for Bad 1 and Good 2 exceptions.

What do you use to change the color settings in BEx Analyzer?

- A. The theme
