QUESTION 1

The new filter can be used in queries as well as in planning. Which of the following statements are correct? (Choose three)

A. The default values determine the initial filter status of the query.

B. The default values are ignored when using the filter for data selection in a planning sequence.

C. \\'Changeable upon execution\\' determines whether the value selection can be changed during query execution.

D. Filters can be used in queries but they can only be created or changed in the planning modeler.

Correct Answer: ABC

QUESTION 2

The Remodeling Toolbox allows you to define:

A. Several subsequent remodeling steps for your most important BI Objects like Queries, InfoProviders and Process Chains.

B. A single remodeling step for InfoCubes or DataStore Objects. Before executing the remodeling process the corresponding InfoProviders have to be emptied.

C. Several remodeling steps for an InfoCube without the need to empty this InfoCube. Remodeling steps can, for example, include adding key figures, or replacing characteristics.

D. A remodeling rule for a process chain, including an integrated batch process consumption check and rescheduling.

Correct Answer: C

QUESTION 3

If two queries are inserted into the same worksheet in a workbook, which of the following is a potential conflict?

A. The results for one query could affect the results for the other query.

B. The first query on the worksheet is the only query accessible by the user.

C. If the user drills down in the first query, the query result could possibly extend into the area occupied by the second query.

D. The security settings of the first query would override the security settings of the second query.

Correct Answer: C

QUESTION 4

What are the options available when choosing types of master data (attributes, texts, hierarchies) in the definition of characteristic InfoObjects? (Choose three)

A. A characteristic InfoObject contains either all types of master data or no master data at all.

B. Each individual master data type can be defined separately for each characteristic InfoObject.

C. You can define a characteristic InfoObject that contains time-dependent texts and timeindependent attributes.

D. If an attribute is time-dependent, it follows that the texts and all other attributes are timedependent as well.

E. There are characteristic InfoObjects for which no text tables exist, but which contain attributes nevertheless.

Correct Answer: BCE

QUESTION 5

Which of the following terms exist in the definition of the delta method? (Choose three)

A. Delta type

B. Delta queue

C. Record mode

D. Serialization

E. Update mode

Correct Answer: ACD
