**QUESTION 1**

You have created a new Data Flow object in the graphical SAP BW data Flow tool by copying a Data Flow template. What must you do to use the new Data Flow? (1)

- A. Copy non-persistent SAP BW Objects
- B. Validate non-persistent SAP BW Objects
- C. Activate non-persistent SAP BW Objects
- D. Replace non-persistent SAP BW objects with active SAP BW objects

Correct Answer: D

QUESTION 2

what does SAP recommend you do to improve the overall reporting performance of a standard InfoCube in SAP BW 7.4? (3)

- A. Create aggregates
- B. Replace the InfoCube by a SPO
- C. Use the process type "Fill OLAP cache" in a process chain
- D. Use navigation attributes instead of dimension characteristics
- E. Use several InfoCubes as PartProviders of a MultiProvider instead of a single standard InfoCube

Correct Answer: ABE

QUESTION 3

You want to update the 3.x version of an SAP BW DataSource to a 7.x version with the capability to restore the original version. What should you do during the migration to achieve this? Please choose the correct answer.

- A. Replace the 3.x SAP BW InfoSource with a 7.x version SAP BW InfoSource.
- B. Migrate the 3.x DataSource version with export.
- C. Delete all entries from the Persistent Staging Area (PSA)
- D. Create a transformation to replace the transfer rules.

Correct Answer: B

QUESTION 4

Your customer wants to model their SAP BW system according to the best practices. You propose using a layered scalable architecture (LSA). Which of the following steps must you perform? (2)

- A. Model disjoint transaction and master data domains for application-specific reporting
- B. Implement the entire corporate information factory enterprise data warehouse architecture
- C. Define specific scenarios for data logistics shaped by the customer environment
- D. Determine which LSA layers are relevant based on the customer's requirements and objectives

Correct Answer: CD

QUESTION 5
