**QUESTION 1**

What do you use to set up a refurbishment order for external refurbishment?

- A. An external operation that contains a subcontracting indicator and a material item with a material provision indicator activated.
- B. An external operation that contains a control key for refurbishment.
- C. An order type for external refurbishment and an assignment of a material with split valuation.
- D. An order type for external refurbishment and a material item with item category External Refurbishment.

Correct Answer: A

QUESTION 2

What are the purposes of technical object structures? (Choose three)

- A. To support Asset Accounting in the description of fixed assets
- B. To display the total number of an asset's individual parts from a design engineering perspective
- C. To identify objects and object parts for maintenance
- D. To collect historical data for maintenance objects
- E. To enable detailed cost analyses

Correct Answer: CDE

QUESTION 3

A user has planned an operation with labor costs and material costs; however, the material cost element is not assigned to a value category.

Where do the material costs appear in the value categories for the order?

- A. In the overhead value category
- B. In a new, automatically created value category
- C. In the unassigned value category
- D. In the internal activity value category

Correct Answer: C

QUESTION 4

What information does the value category provide in the maintenance order?

- A. The costs details for individual technical objects
- B. The costs by work center
- C. The material costs by valuation category
- D. A summary of costs for multiple cost elements

Correct Answer: D

QUESTION 5

What does the structure indicator for a functional location determine? (Choose three)

- A. The functional location type
- B. The number of characters for each hierarchy level
- C. The edit mask
- D. The functional location category
- E. The number of hierarchy levels for a particular structure

Correct Answer: BCE
