### QUESTION 1

What could be a consequence of the confirmation of an operation?

- A. Settlement of the actual costs
- B. Reduction of capacity requirements
- C. Rescheduling of the production order
- D. Update of the planned costs

Correct Answer: B

---

### QUESTION 2

In your company planning strategies are used in the SAP-ECC demand management that are based on consumption. Which of the following statements about consumption is true? (Choose two.)

- A. A consumption situation is dynamic and is always restructured with the planning run.
- B. Consumption can also take place between order reservations and planned independent requirements, depending on the strategy.
- C. Consumption always takes place on the material level between the planned independent requirements and the planned orders.
- D. The consumption parameters (consumption mode and consumption interval) can be set in the material master or in the MRP group.

Correct Answer: BD

---

### QUESTION 3

During a project phase, your customer raises some questions concerning parameters of the procurement type in the material master in the SAP ECC system.

Which of the following procurement type properties are valid? (Choose two)

- A. If both procurement types are allowed with entry X (both procurement types), requirements planning assumes in-house production.
- B. Procurement types E (in-house production) and F (external procurement) always have to be further refined with special procurement types.
- C. Procurement types E (in-house production), F (external procurement), or X (both procurement types) can be selected for a material independent of the material type.
- D. If procurement type E (in-house production) is set, external procurement may still be possible, depending on the material type.

Correct Answer: AD

---

#### QUESTION 4

What data can be posted directly via the Plant Data Collection (PP-PDC) interface?

- A. Goods receipts
- B. Maintenance notifications
- C. Confirmations
- D. Goods issues

Correct Answer: C

---
