**QUESTION 1**

Which activity can trigger an automatic availability check for the components of a production order?

- A. Material staging
- B. Order rescheduling
- C. Order release
- D. Goods receipt for a missing part

Correct Answer: C

QUESTION 2

During a project phase, your customer raises some questions concerning parameters of the procurement type in the material master in the SAP ECC system.

Which of the following procurement type properties are valid? (Choose two)

- A. If both procurement types are allowed with entry X (both procurement types), requirements planning assumes in-house production.
- B. Procurement types E (in-house production) and F (external procurement) always have to be further refined with special procurement types.
- C. Procurement types E (in-house production), F (external procurement), or X (both procurement types) can be selected for a material independent of the material type.
- D. If procurement type E (in-house production) is set, external procurement may still be possible, depending on the material type.

Correct Answer: AD

QUESTION 3

Which of the following statements about consumption are correct? (Choose two)

- A. Consumption takes place on the material level between the planned independent requirements and the planned orders.
- B. Consumption parameters (consumption mode and consumption interval) can be set in the material master or in the MRP group.
- C. Consumption is restructured with the planning run.
- D. Consumption can take place between order reservations and planned independent requirements, depending on the strategy.

Correct Answer: BD

QUESTION 4

Which activities lead to a reduction of the capacity requirements for an operation? (Choose three)

- A. Rescheduling the operation
- B. Posting the goods receipt for the production order
- C. Confirming the operation
- D. Setting the status technically complete (TECO)
- E. Reducing the order quantity

Correct Answer: CDE

QUESTION 5

Which property applies for consumption with planning strategy 40 (planning with final assembly)?

- A. Consumption creates a static and binding assignment between the planned independent requirements and the customer requirements for the entire procurement process.
- B. Consumption takes place with the planning material.
- C. Consumption can reduce the total originally planned production quantity.
- D. Consumption can increase the total originally planned production quantity.

Correct Answer: D
