### QUESTION 1

You select the master data for production orders via production versions.

Which information is contained in a production version?

- A. The explosion dates for the routing and BOM
- B. The routing and BOM alternatives to be used
- C. The default order type to be used
- D. The control parameters for selecting routings and BOM

Correct Answer: B

---

### QUESTION 2

During a project phase, your customer raises some questions concerning parameters of the procurement type in the material master in the SAP ECC system.

Which of the following procurement type properties are valid? (Choose two)

- A. If both procurement types are allowed with entry X (both procurement types), requirements planning assumes in-house production.
- B. Procurement types E (in-house production) and F (external procurement) always have to be further refined with special procurement types.
- C. Procurement types E (in-house production), F (external procurement), or X (both procurement types) can be selected for a material independent of the material type.
- D. If procurement type E (in-house production) is set, external procurement may still be possible, depending on the material type.

Correct Answer: AD

---

### QUESTION 3

Which Customizing element controls the determination of planned costs in production orders?
