QUESTION 1

You create a routing that includes five operations in an initial sequence (10, 20, 30, 40, 50). When capacity bottlenecks occur, you want to use a second sequence on other work centers for operations 30 and 40.

Which sequence category do you use to create the second sequence in the system?

- A. Finish-start relationship
- B. Standard sequence
- C. Parallel sequence
- D. Alternative sequence

Correct Answer: D

QUESTION 2

What is SAP Solution Manager?

- A. A transaction in the SAP ECC system
- B. A standalone system that communicates with other systems in a system landscape
- C. An add-on industry solution
- D. A managed system in a system landscape

Correct Answer: B

QUESTION 3

What data can be posted directly via the Plant Data Collection (PP-PDC) interface?

- A. Goods receipts
- B. Maintenance notifications
- C. Confirmations
- D. Goods issues

Correct Answer: C

**QUESTION 4**

With which functions of the process order can you fulfill the requirements of the Good Manufacturing Practices (GMP) standard? (Choose three.)

- A. Material identification and reconciliation
- B. Availability check
- C. Batch record
- D. Resource selection
- E. Digital signature

Correct Answer: ACE

QUESTION 5

You want to plan a finished material using material requirements planning in an SAP ECC system. The resulting planned orders should be scheduled using basic date scheduling (not lead-time scheduling).

Which of the following properties for the resulting dependent requirements applies?

- A. In multi-level backward scheduling, dependent requirements are calculated to the exact second.
- B. If the individual material components are explicitly assigned to the operations of a routing, the requirement dates of the dependent requirements are scheduled at each start date of the operations.
- C. When a customer order is created for the finished material, the dependent requirements are automatically triggered for the components in the bill of material without a planning run.
- D. In multi-level backward scheduling, dependent requirements are triggered at the start date for the planned order of the finished material.

Correct Answer: D
