**QUESTION 1**

Company ABC has a 100Mbps fiber connection from headquarters to a remote office 200km (123 miles) away. This connection is provided by the local cable television company. ABC would like to extend a secure VLAN to the remote office, but the cable company says this is impossible since they already use VLANs on their internal network. Which of the following protocols should the cable company be using to allow their customers to establish VLANs to other sites?

- A. IS-IS
- B. EIGRP
- C. MPLS
- D. 802.1q

Correct Answer: C

---

**QUESTION 2**

A project manager working for a large city government is required to plan and build a WAN, which will be required to host official business and public access. It is also anticipated that the city's emergency and first response communication systems will be required to operate across the same network. The project manager has experience with enterprise IT projects, but feels this project has an increased complexity as a result of the mixed business / public use and the critical infrastructure it will provide. Which of the following should the project manager release to the public, academia, and private industry to ensure the city provides due care in considering all project factors prior to building its new WAN?

- A. NDA
- B. RFI
- C. RFP
- D. RFQ

Correct Answer: B

---

**QUESTION 3**

Due to compliance regulations, a company requires a yearly penetration test. The Chief Information Security Officer (CISO) has asked that it be done under a black box methodology. Which of the following would be the advantage of conducting this kind of penetration test?

- A. The risk of unplanned server outages is reduced.
- B. Using documentation provided to them, the pen-test organization can quickly determine areas to focus on.
- C. The results will show an in-depth view of the network and should help pin-point areas of internal weakness.
- D. The results should reflect what attackers may be able to learn about the company.

Correct Answer: D

---

#### QUESTION 4

Company A has experienced external attacks on their network and wants to minimize the attacks from reoccurring. Modify the network diagram to prevent SQL injections, XSS attacks, smurf attacks, e-mail spam, downloaded malware, viruses and ping attacks. The company can spend a MAXIMUM of \$50,000 USD. A cost list for each item is listed below:

1.

Anti-Virus Server - \$10,000

2.

Firewall-\$15,000

3.

Load Balanced Server - \$10,000

4.

NIDS/NIPS-\$10,000

5.

Packet Analyzer - \$5,000

6.

Patch Server-\$15,000

7.

Proxy Server-\$20,000

8.

Router-\$10,000

9.

Spam Filter-\$5,000

10.

Traffic Shaper - \$20,000

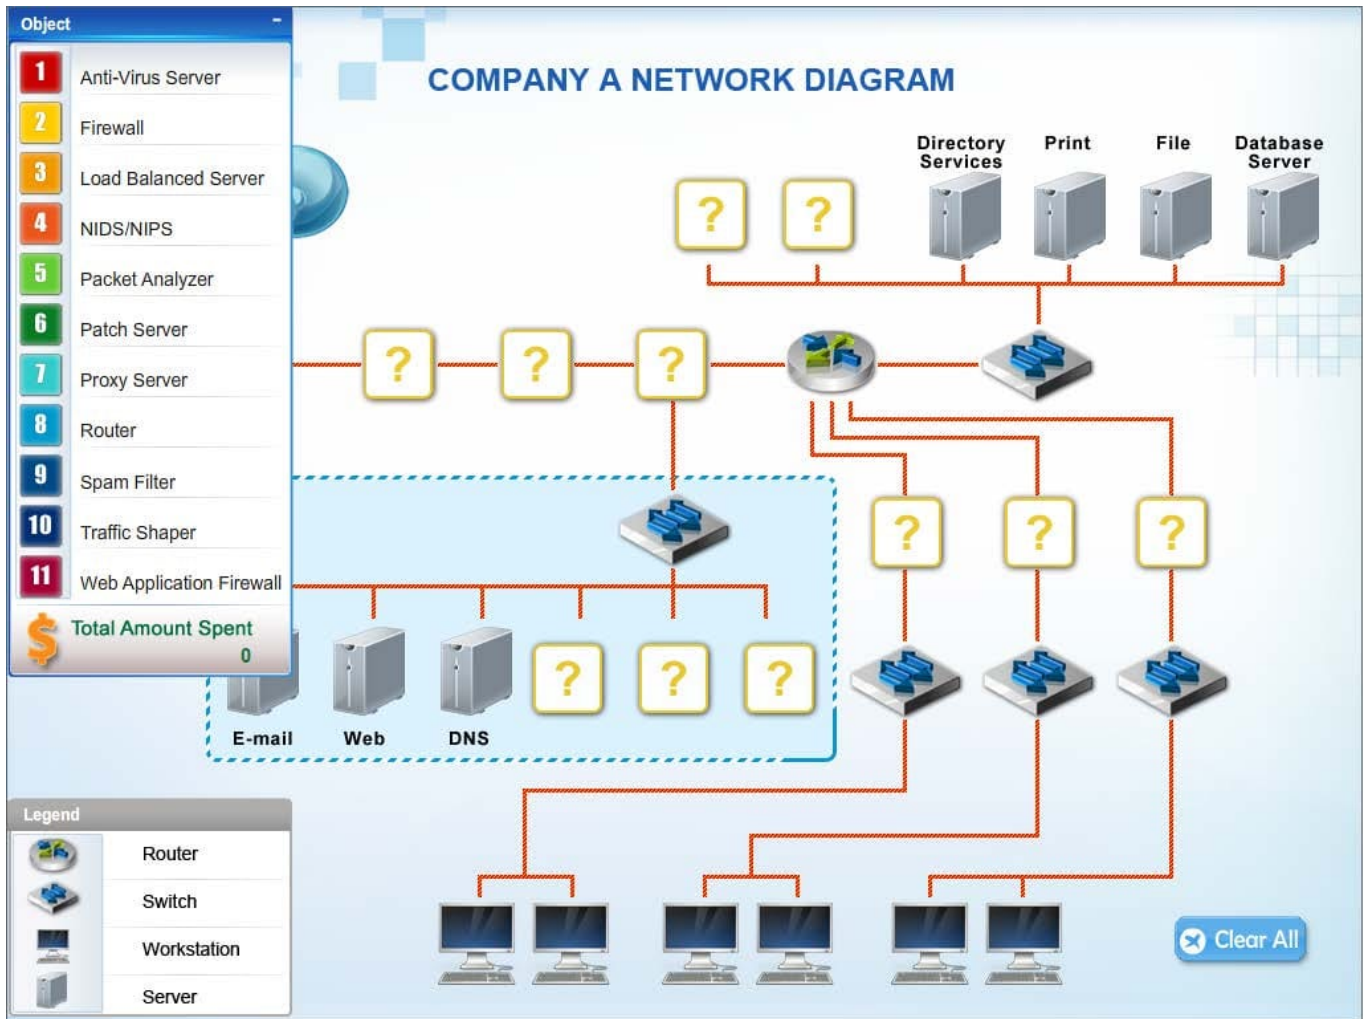

11.

Web Application Firewall - \$10,000

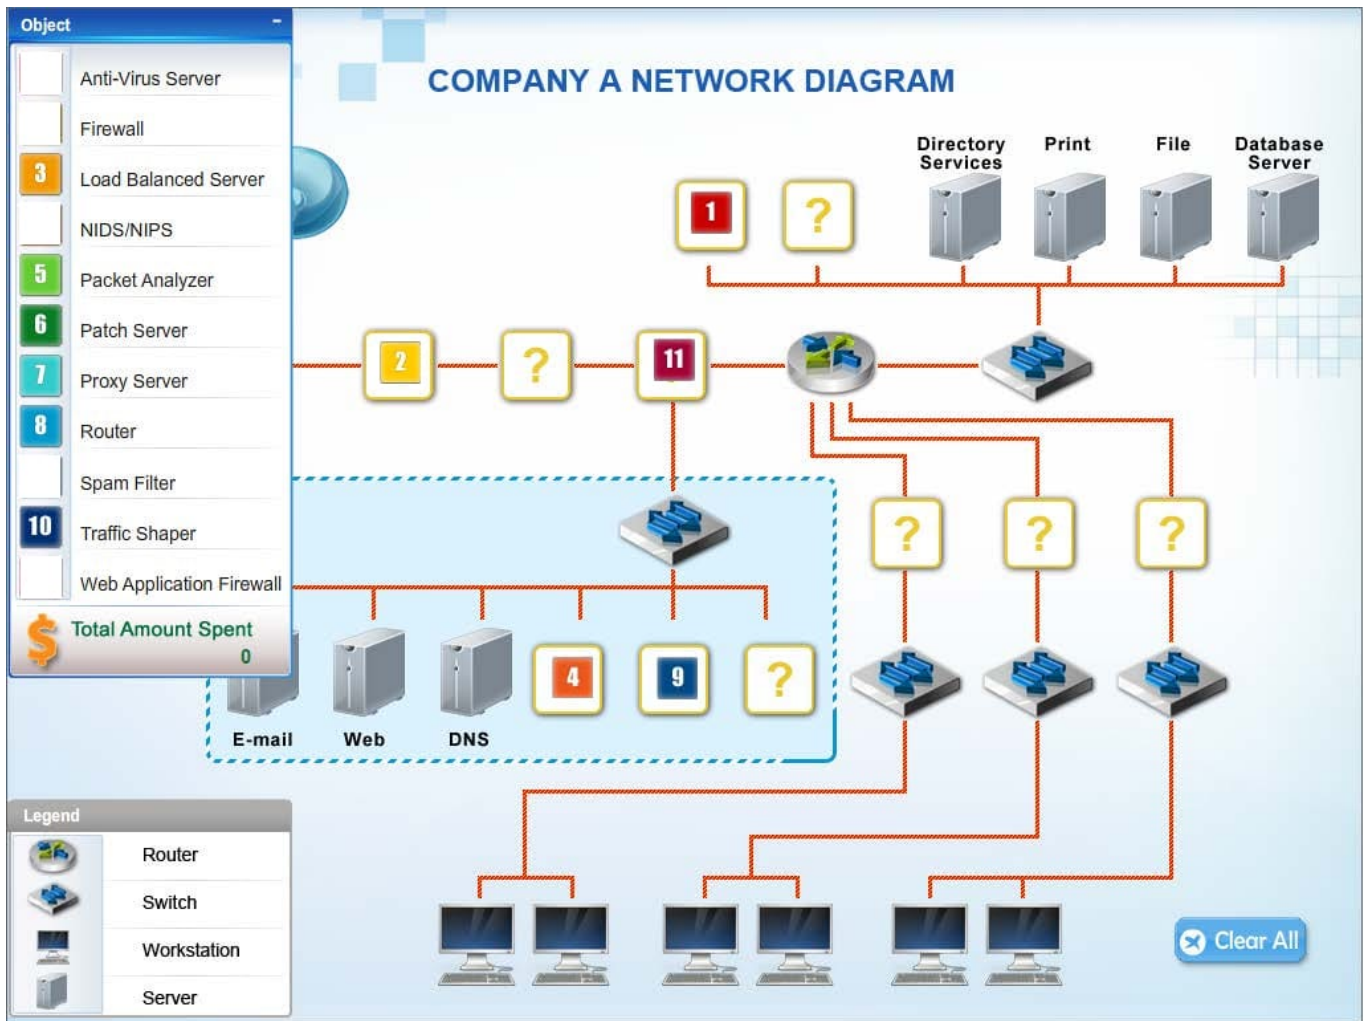

Instructions: Not all placeholders in the diagram need to be filled and items can only be used once. If you place an object on the network diagram, you can remove it by clicking the (x) in the upper right-hand of the object.

### QUESTION 5

There has been a recent security breach which has led to the release of sensitive customer information. As part of improving security and reducing the disclosure of customer data, a training company has been employed to educate staff. Which of the following should be the primary focus of the privacy compliance training program?

- A. Explain how customer data is gathered, used, disclosed, and managed.
- B. Remind staff of the company's data handling policy and have staff sign an NDA.
- C. Focus on explaining the "how" and "why" customer data is being collected.
- D. Republish the data classification and the confidentiality policy.

Correct Answer: A
