QUESTION 1

In your company, authentication information is stored in a central Oracle repository. However, authorization information is spread across several different SQL Server and Oracle user directories associated with specific applications. The Social Security Number (SSN) of employees is common to all user directories. You are likely to use Lightweight Directory Access Protocol (IDAP) directories in the near future. Which statement about CA SiteMinder directory mapping options is TRUE?

A. It is best to use the identical DN method to mapIDAP directories to the central Oracle repository.

B. When mapping relational database directories to each other, Universal ID is the only method available.

C. When mappingIDAP user directories to the central Oracle repository, Universal ID is the only method available.

D. You can choose between the Universal ID and Identical DN methods when mapping relational databases with the central Oracle repository for authentication.

Correct Answer: C
