QUESTION 1

By default, CA SiteMinder session cookies:

- A. are transient.
- B. are persistent.
- C. are stored on a web server.
- D. are not associated with any particular domain.

Correct Answer: A

QUESTION 2

When using the Active Directory namespace, which Lightweight Directory Access Protocol (LDAP) feature can you implement?

- A. LDAP paging
- B. LDAP referrals
- C. LDAP sorting operations
- D. SSL connectivity using a native Windows Certificate database

Correct Answer: D

QUESTION 3

You will need to configure virtual servers in different cookie domains for protection by the Web Agent. You want to configure the Web Agent to identify the cookie domain of an incoming request based on the incoming host header. Which action do you need to perform?

- A. Set CookieDomain to none.
- B. Set CookieDomainScope to 1.
- C. Set CookieDomainScope to auto.
- D. Set CookieDomain to .forward.com.

Correct Answer: A

QUESTION 4

When configuring Agent parameters, what is the purpose of setting the CSSChecking parameter to yes?

- A. To instruct the Web Agent to check a script for references to blocked URLs
- B. To permit the interpretation of double quotation marks as ASCII characters
- C. To instruct the Web Agent to check a URL for characters that may be part of an executable script
- D. To specify that CA SiteMinder policies must apply to requests from the Web Agent to the web server

Correct Answer: C

QUESTION 5

Which guideline applies when using a custom login page?

- A. Ensure the login page is protected.
- B. Use the GET rather than the POST method.
- C. Place the target page in an unprotected directory.
- D. Use an unprotected stub login page to reach the protected login page.

Correct Answer: A
