#### QUESTION 1

To log into a specific server and uninstall a Data Collector, which account do you use?

- A. Root
- B. Admin
- C. IT Operator
- D. Any user with access to the server

Correct Answer: A

---

#### QUESTION 2

In which circumstance do you typically need to create a new metric family?

- A. Each time you create a new monitoring profile
- B. Each time you create a custom vendor certification
- C. When you need to monitor a new type of technology
- D. When you want to restrict what you monitor to maximize performance

Correct Answer: C

---

#### QUESTION 3

When planning menus for dashboards, which guideline should you follow?

- A. Never add custom dashboards to a default menu.
- B. Share custom menus between tenants with similar needs.
- C. Use the Manage Menus page to organize dashboards in a meaningful way.
- D. If specific dashboards should not be available to a user, add them to a menu as a dimmed menu item.

Correct Answer: C

---

#### QUESTION 4

- A. Help icons bring you to the correct section of the online help.
- B. Information on users and roles is available in the Data Aggregator guide only.
- C. Online help is solely accessible from the Help link in the upper-right corner of the CA Performance Center UI.

D. The administration guides might save you time when you are attempting an unfamiliar administrative operation.

Correct Answer: AD

---

#### QUESTION 5

As the Global Administrator of a CA Performance Management instance that hosts three tenants, you are only able to see two of the five available SNMP profiles. Why are you unable to view all five profiles?

- A. Because in this instance, two profiles are associated with the tenant you are currently administering
- B. Because Global Administrators typically need to refresh the screen before the full set of profiles appear
- C. Because the Global Administrator must change an entry in the SNMP\_549.xml file to see all SNMP profiles
- D. Because the tenant administrators must change the permission of the SNMP profiles that they manage to enable the Global Administrator to see them

Correct Answer: A
