**QUESTION 1**

In which circumstances is it particularly appropriate to use the multi-tenancy features of CA Performance Management? (Choose two)

- A. To administer several customer environments from a single instance of CA Performance Center
- B. To make it easier to configure CA Performance Center and its data sources for multiple languages
- C. To segregate device monitoring in large business units, departments, or regional offices from each other
- D. To have CA Performance Center reconcile the identity of a single managed item that is monitored by multiple data sources into a single item in the inventory

Correct Answer: AC

---

**QUESTION 2**

If you are planning to implement custom menus, which factor should you consider?

- A. They cannot be used to open default dashboards.
- B. They are automatically deleted if all their associated user accounts are deleted.
- C. They are unavailable to users until an administrator edits a role to include the menu and assigns it to a user.
- D. They should be created by administrators for every user so that each dashboard a user needs is always readily available on one or more custom menus.

Correct Answer: C

---

**QUESTION 3**

When you are editing a monitoring profile for the first time, you notice that the default detection rate is zero and the Update Metric Families check box is selected. How does this affect how the Data Aggregator monitors device reconfiguration?

- A. Device configuration will be set to false.
- B. Device configuration changes will be ignored.
- C. Device configuration changes will be immediately updated upon detection.
- D. Device reconfiguration will be checked when changes to the metric family occur.

Correct Answer: C

---

**QUESTION 4**

Which step enables you to validate the installation of CA Performance Center?

- A. Check that the Vertica database can be stopped and restarted.
- B. Run `ps-aef | grep java` and examine the running java processes.
- C. Check that the Data Collectors are able to connect to the MySQL database.
- D. Successfully log in to the CA Performance Center console from a supported web browser.

Correct Answer: D

---

#### QUESTION 5

When you are planning Data Repository backups, which factor should you consider?

- A. Best practice is to perform backups on a daily basis.
- B. Backups can introduce the risk of a simultaneous failure in Vertica.
- C. The database backup should be viewed as a best practice and not a requirement.
- D. The backup interval depends on the data loss tolerance of the enterprise customer.

Correct Answer: D
