**QUESTION 1**

- A. Help icons bring you to the correct section of the online help.
- B. Information on users and roles is available in the Data Aggregator guide only.
- C. Online help is solely accessible from the Help link in the upper-right corner of the CA Performance Center UI.
- D. The administration guides might save you time when you are attempting an unfamiliar administrative operation.

Correct Answer: AD

QUESTION 2

To log into a specific server and uninstall a Data Collector, which account do you use?

- A. Root
- B. Admin
- C. IT Operator
- D. Any user with access to the server

Correct Answer: A

QUESTION 3

While logged in as a tenant administrator you begin creating the user accounts for that tenant. You want to assign a specific role to an account. However, the role does not appear to be among the available roles. What is the likely reason for this?

- A. The role has not been created.
- B. The role was assigned to another tenant.
- C. You do not have permission to see the role.
- D. Only CA Technologies Services can perform this action.

Correct Answer: A

QUESTION 4

When you are editing a monitoring profile for the first time, you notice that the default detection rate is zero and the Update Metric Families check box is selected. How does this affect how the Data Aggregator monitors device reconfiguration?

- A. Device configuration will be set to false.

- B. Device configuration changes will be ignored.
- C. Device configuration changes will be immediately updated upon detection.
- D. Device reconfiguration will be checked when changes to the metric family occur.

Correct Answer: C

QUESTION 5

When you are uninstalling the CA Performance Management components, which guidelines should you follow? (Choose two)

- A. Uninstall the Data Collectors before you uninstall the Data Aggregator.
- B. Uninstall the Data Aggregator before you uninstall the Data Repository.
- C. Back up the Data Repository before you uninstall it, in case you want to use it at a later time.
- D. When uninstalling the Data Repository, if the database is running in a cluster, launch adminTools from any node in the cluster.

Correct Answer: CD
