100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by ISC Official Exam Center

- ⚙ **Instant Download** After Purchase
- ⚙ **100% Money Back** Guarantee
- ⚙ **365 Days** Free Update
- ⚙ **800,000+** Satisfied Customers

**QUESTION 1**

Which of the following threat types involves an application that does not validate authorization for portions of itself after the initial checks?

- A. Injection
- B. Missing function-level access control
- C. Cross-site request forgery
- D. Cross-site scripting

Correct Answer: B

It is imperative that an application perform checks when each function or portion of the application is accessed, to ensure that the user is properly authorized to access it. Without continual checks each time a function is accessed, an attacker could forge requests to access portions of the application where authorization has not been granted.

---

**QUESTION 2**

Which protocol does the REST API depend on?

- A. HTTP
- B. XML
- C. SAML
- D. SSH

Correct Answer: A

Representational State Transfer (REST) is a software architectural scheme that applies the components, connectors, and data conduits for many web applications used on the Internet. It uses and relies on the HTTP protocol and supports a variety of data formats.

---

**QUESTION 3**

In order to ensure ongoing compliance with regulatory requirements, which phase of the cloud data lifecycle must be tested regularly?

- A. Archive
- B. Share
- C. Store
- D. Destroy

Correct Answer: A

In order to ensure compliance with regulations, it is important for an organization to regularly test the restorability of archived data. As technologies change and older systems are deprecated, the risk rises for an organization to lose the ability to restore data from the format in which it is stored. With the destroy, store, and share phases, the currently used technologies will be sufficient for an organization's needs in an ongoing basis, so the risk that is elevated with archived data is not present.

---

#### QUESTION 4

Which approach is typically the most efficient method to use for data discovery?

- A. Metadata
- B. Content analysis
- C. Labels
- D. ACLs

Correct Answer: A

Metadata is data about data. It contains information about the type of data, how it is stored and organized, or information about its creation and use.

---

#### QUESTION 5

Which publication from the United States National Institute of Standards and Technology pertains to defining cloud concepts and definitions for the various core components of cloud computing?

- A. SP 800-153
- B. SP 800-145
- C. SP 800-53
- D. SP 800-40

Correct Answer: B

NIST Special Publications 800-145 is titled "The NIST Definition of Cloud Computing" and contains definitions and explanations of core cloud concepts and components.
