QUESTION 1

During your pre-trip inspection, which of the following items should you check?

- A. Service brakes, parking brake, steering mechanism
- B. Horn, windshield wipers, emergency exit handles
- C. Fire extinguisher, emergency reflector
- D. All of the above

Correct Answer: D

The correct answer is: All of the above. During your pre-trip inspection, it is important to check the vehicle systems (brakes, steering, lights, tires, horn etc.), access doors and panels (emergency exits, baggage and restroom service panels).

QUESTION 2

Common medicines for colds can make you sleepy.

- A. True
- B. False

Correct Answer: A

QUESTION 3

How should you check that you have sufficient emergency airflow to all trailers in a set of doubles or triples?

- A. Use the trailer hand brake to supply air. Go to the rear of the last trailer, open the service line valve and listen for air escaping.
- B. Move the trailers and apply the emergency brakes.
- C. Push in the red trailer air supply knob, open the emergency line shut-off valve at the rear of the last trailer and listen for air escaping.
- D. Fully charge the air system, activate the emergency brakes and look for a 15 psi air pressure reduction

Correct Answer: C

The correct answer is: Push in the red trailer air supply knob, open the emergency line shut-off valve at the rear of the last trailer and listen for air escaping. To check the service line air flow, you use the trailer hand brake to supply air to the service lines. Go to the rear of the last trailer, open the service line valve and listen for air escaping.

QUESTION 4

What must you check before transporting a sealed load?

- A. The placard numbers match the seal numbers.
- B. That the seal is authentic.
- C. That the seal is secure.
- D. The load is properly secured.

Correct Answer: D

QUESTION 5

When backing your vehicle, which of the following is NOT recommended

- A. Back as slow as possible
- B. Back towards the right side
- C. Use the lowest reverse gear
- D. Back and turn towards the driver's side

Correct Answer: B

The answer is: Back towards the right side. When backing your vehicle you should always back and turn towards the driver's side, even if it means going around the block to put your vehicle in the right position. Backing towards the right side is very dangerous because you cannot see well.
