QUESTION 2

A security analyst has been asked to provide a triple A service (AAA) for both wireless and remote access network services in an organization and must avoid using proprietary solutions.

What technology SHOULD they adapt?

- A. TACACS+
- B. RADIUS.
- C. Oauth.
- D. MS Access Database.

Correct Answer: C

QUESTION 3

Why have MOST European countries developed specific legislation that permits police and security services to monitor communications traffic for specific purposes, such as the detection of crime?

- A. Under the European Convention of Human Rights, the interception of telecommunications represents an interference with the right to privacy.
- B. GDPR overrides all previous legislation on information handling, so new laws were needed to ensure authorities did not inadvertently break the law.
- C. Police could previously intercept without lawful authority any communications in the course of transmission through a public post or telecoms system.
- D. Surveillance of a conversation or an online message by law enforcement agents was previously illegal due to the

1950 version of the Human Rights Convention.

Correct Answer: C

QUESTION 4

In a virtualised cloud environment, what component is responsible for the secure separation between guest machines?

- A. Guest Manager
- B. Hypervisor.
- C. Security Engine.
- D. OS Kernal

Correct Answer: A

QUESTION 5

For which security-related reason SHOULD staff monitoring critical CCTV systems be rotated regularly during each work session?

- A. To reduce the chance of collusion between security staff and those being monitored.
- B. To give experience to monitoring staff across a range of activities for training purposes.
- C. Health and Safety regulations demand that staff are rotated to prevent posture and vision related harm.
- D. The human attention span during intense monitoring sessions is about 20 minutes.

Correct Answer: D
