**QUESTION 1**

Which practices optimize performance on large systems? Choose 2 answers

- A. Run all builds on agents and never on the master itself.
- B. Use the maximum number of executors at all times and avoid using labels.
- C. Avoid modifying Java parameters that control heap size and garbage collection.
- D. Use plugins as much as possible.
- E. Allocate specific masters for different build types and teams.

Correct Answer: AD

---

**QUESTION 2**

A multi-configuration job contains the combination filter `index% 4=1`. What does this filter achieve?

- A. It removes 3 combinations in every 4.
- B. It removes one combination in every 4.
- C. It removes the fourth combination.
- D. Nothing. The syntax is Invalid.
- E. It removes the first combination.

Correct Answer: B

---

**QUESTION 3**

One quality of an ideal build node K that it is\_\_\_\_\_.

- A. ephemeral and replaceable
- B. tailored to specific builds
- C. on-master
- D. static

Correct Answer: A

---

**QUESTION 4**

A Freestyle job is configured to execute concurrent builds, and to only build on a specific agent (agent A) that has 4

executors. You observe that 2 Instances of the job are currently building while several others are waiting in the build queue. Which of the following could explain why the builds are waiting in the build queue?

- A. There are not enough idle executors available on agent A.
- B. Changes were made to this job's configuration while this Job had builds in the build queue.
- C. Each build in the build queue must be manually attached to an available executor.
- D. The "Execute concurrent builds if necessary option in the job configuration has reached its user-defined maximum.

Correct Answer: A

---

#### QUESTION 5

What does the M# of executors" field on the Jenkins master control?

- A. Maximum number of jobs which can be run concurrently on attached agents.
- B. Number of Java threads that can run Jenkins jobs.
- C. Number of external build agents that can be used for jobs run on this Jenkins master.
- D. Number of CPU cores configured for this master.
- E. Number of jobs that can execute simultaneously on the Jenkins master

Correct Answer: E
