QUESTION 1

You\\'ve just become the administrator for the Jenkins server, and the feedback you\\'ve received from the users is they\\'re having trouble locating their jobs to run them. You\\'ve determined that folders are the most logical solution and wish to move the jobs into the new folders you\\'ve created. How would you accomplish this?

A. All of these

B. Click existing item; in the item view page, select "move" on the left panel; select target folder.

C. For new items, click folder; in the folder view, select new item; it will automatically be added to that folder.

D. Hover and click arrow on existing item, choose "move", select target folder.

Correct Answer: B

All of these options are ways to add projects to folders.

QUESTION 2

What best describes DevOps?

A. None of these

B. A pioneer in education

C. An organizational culture where developers and operations are working in harmony

D. The practice of developing optimal work practices

Correct Answer: C

DevOps is a cultural movement that helps facilitate continuous integration concepts by bringing Dev and Ops into harmony, where they may have been separate previously.

QUESTION 3

You can set project-based security for users.

A. False

B. True

Correct Answer: B

You can set security on a per-project basis.

QUESTION 4

What is a code coverage test?

A. It tests components coming together

B. It tests against the product specifications.

C. It tests a small piece of functionality, usually at the class method level.

D. It tests how well your code is tested.

Correct Answer: D

QUESTION 5
