**QUESTION 1**

Which two pieces of information should always be recorded in the stakeholder list? (1 Point)

- A. Importance of the stakeholders
- B. Role designation
- C. Length of service with a company
- D. Disciplinary superior
- E. References to previously conducted projects

Correct Answer: BC

---

**QUESTION 2**

In requirements engineering, the use of model-based documentation is very helpful. Behaviour, functions and the structures of the entity being considered can be represented with diagrams. Which two of the following diagrams help to represent the structural perspective of the requirements model? (1 Point)

- A. Entity-relationship diagram
- B. State diagram
- C. Deployment diagram
- D. Class diagram
- E. Data diagram

Correct Answer: AD

---

**QUESTION 3**

You carry out modelling of requirements with a use case diagram. Which answer best describes its prospective modelling elements? (1 Point)

- A. Objects, activities and associations
- B. Actors, messages and activities
- C. Objects, use cases and activities
- D. Actors, use cases and associations

Correct Answer: D

---

**QUESTION 4**

In a meeting held with the goal of validating a set of requirements, two participants become involved in an in-depth discussion about the content of a requirement. One of the participants is of the opinion that the requirement must be realized as described, since the success of the product is otherwise jeopardized. The other party dissents and argues that this requirement cannot be realized technically as described. What is the best way for you to react to this situation? (1 Point)

- A. You note both arguments and let the project manager make the decision.
- B. You invite all stakeholders to a workshop and try to reach agreement.
- C. You prefer the second opinion since you believe that the discussion makes no sense if the requirement cannot be realized.
- D. You get together with the affected stakeholders and attempt to reach an agreement on this.

Correct Answer: D

---

**QUESTION 5**

You are assigned to carry out and document a system and context delimitation for a software system that is to be developed. What diagram is least suited for the representation of the delimitation? (1 Point)

- A. Class diagram
- B. Use case diagram
- C. State diagram
- D. Context diagram with data flows

Correct Answer: C
