**QUESTION 1**

The administrator at Universal Containers needs to convert a lookup relationship to a master-detail relationship. What should the administrator verify to ensure that conversion is successful?

- A. No roll-up summaries exist on the lookup object
- B. The owner is the same for all related records
- C. The lookup field in all records contains a value
- D. The lookup field is required on the child object

Correct Answer: C

QUESTION 2

The VP of Marketing is launching campaigns in each region to target accounts that do not have open opportunities. What reporting solution can an administrator set up to assist with this?

- A. Standard Filter
- B. Cross Filter
- C. Reporting snapshot
- D. Joined report

Correct Answer: C

QUESTION 3

A recruiting user needs to setup an object relationship between the position object and the job application object. He needs this setup so that a position record can be related to many job application records and job application records can be related to many Position Records. He also needs this in a setup where deleting a position record will delete all related job application records and deleting a job application record deletes all related position records. What can a system administrator do to fulfill the requirement?

- A. Create a junction object between the Job Application and Position object.
- B. Create two master-detail relationships where both can be master and both can be detail records
- C. Create a custom object looking up to a junction object
- D. Create a lookup relationship on both objects

Correct Answer: A

QUESTION 4

Users report that the Industry picklist field is no longer visible on account records. What tool can an administrator use to troubleshoot this issue?
