**QUESTION 1**

Which of the following descriptions is an example of the use of defect taxonomies? Number of correct answers: 1

- A. Grouping defects found in execution by functional areas
- B. Following a defect management process through testing
- C. Running tests with the aim of finding as many defects as possible
- D. Using a list of known defect types to penetrate the security of computer systems

Correct Answer: D

QUESTION 2

For a tax system the earnings 4.000 are tax free, the following 1.500 are charged at 10%, the following 28.000 at 20% and the remainder above 40%. All values are rounded to 1. What test case could result from a boundary value analysis?

- A. 1500
- B. 33501
- C. 4499
- D. 28001

Correct Answer: B

QUESTION 3

Ken, an entrepreneur in Leeds finds the quality of the tea locally available so low, that he decides to research superior teas around the world. He decides to market, sell and distribute these superior teas via the web. His market strategy is to offer superior products on a well-designed website with graphics that are fast to load, has high availability, superior usability and fast response times.

The website will offer the following:

- An innovative interactive catalogue of teas, which not only enables customers to buy the product, but also enables them to provide feedback by rating the teas (which will influence his stock purchasing levels)

-

Provide the customer with the ability to use secure credit card transactions

-

Provide the customer to give general feedback

Ken selects an iterative model for the development of the prototypes. The team consists of three developers that are experienced in web development. Ken, although he doesn't have technical skillset, is concerned with quality. He doesn't

believe a lot of documentation is necessary and he wants the website to be completed quickly.

The test basis contains the following:

-Story boards that show the information flow and page links through the site

-HTML pages developed to date.

-

A statement of non-functional requirements.

With the strategy taking shape, Ken asks your advice on the specific testing techniques that should be used to complete the required testing, bearing in mind the nature of the application and the nature of Ken's overall objectives.

We now make the assumption that in the scenario described as above, exploratory testing was selected as being the main test technique. You have now been given the task of specifying, executing and recording the exploratory test sessions.

Select TWO of the options below to define what you will typically use for specifying, executing and recording the sessions?

A.

Record the results in email and send the email to the test manager.

B.

Use external testers on the team to provide a new approach and fresh view to the testing effort.

C.

Create test charters for planned test session.

D.

Use debriefing sessions with stakeholders and other testers to discuss the findings and new risks identified.

E.

Define concrete test cases to be executed by the developers.

Correct Answer: CD

QUESTION 4

A new banking system has 2 customers' types, 2 account types and will operate in two different countries?

How many test cases will be needed using the pair wise testing technique and the appropriate 2-wise orthogonal array?

- A. 2
- B. 4
- C. 5
- D. 8

Correct Answer: B

QUESTION 5

In an organization using keyword-driven automation, which of the following activities typically is the responsibility of the test analyst?

- A. Write the code to automate the key processes
- B. Work with the users to define the key usability aspects of the software
- C. Identify the key business processes that must be tested
- D. Write manual tests for the key business processes that can then be automated

Correct Answer: C
