QUESTION 1

Which of the following would be the TWO most appropriate examples of entry criteria documented in the system integration test plan?

- A. The percentage of decision coverage achieved during unit testing.
- B. The availability of the latest version of the capture-replay tool (for testing the interface with the newly developed test management tool).
- C. The sign-off of a performance test software release note (test item transmittal report) by both development and testing showing that system performance meets the specified acceptance criteria.
- D. The percentage of acceptance test procedures scheduled for execution.
- E. The percentage of requirements coverage achieved during system integration test.

Correct Answer: AB

QUESTION 2

You have been asked to write a testing strategy for the company.

Which statement best explains how risk can be addressed within the testing strategy?

- A. A test strategy should address identified generic product risks and present a process for mitigating those risks in line with the testing policy.
- B. A test strategy identifies the specific product for a project risk and defines the approach for the test project.
- C. A test strategy is derived from the test policy and describes the way risk assessments are performed in projects.
- D. A test strategy is the result of a project risk analysis and defines the approach and resources for testing.

Correct Answer: A

QUESTION 3

Within the projects, a master test plan and phase test plan will be used. Following is a list of characteristics applicable for test plans:

Which THREE mentioned characteristics relate to the master test plan?

- A. Any deviation from the procedures described in the test strategy document
- B. The overall estimated costs, timescales and resource requirements

- C. A detailed schedule of testing activities
- D. The development deliverables to be tested
- E. Which test staff members (names) will be involved and when
- F. Level of requirements coverage achieved

Correct Answer: ABD

QUESTION 4

In general which part of the testing activity is most difficult to estimate?

- A. Test planning
- B. Test execution
- C. Test management
- D. Test design

Correct Answer: B

QUESTION 5

Part of the testing strategy indicates that you are going to be using systematic test design techniques. Your manager has asked that you present the main advantages of using these techniques at the next board meeting.

Identify THREE main benefits of using systematic test design techniques within this company.

- A. Easier to quickly adapt testing to changing requirements compared to experienced- based testing
- B. Targets certain types of faults
- C. Will guide experienced testers to find defects
- D. Provides a way to differentiate depth of testing based on product risks by using different techniques
- E. More enhanced documentation and therefore higher repeatability and reproducibility
- F. Will make non-systematic testing redundant
- G. Will reduce the need for early reviews

Correct Answer: BDE
