**QUESTION 1**

Which of the following statements correctly describe Black-Box Testing?

- A. Test on an individual software component in isolation from other components, to avoid external influence.
- B. Tests that investigate the input vs. the output behavior of a software system.
- C. Test derived from the ability of the testers and their intuition and experience with similar applications and technologies (sometimes used to strengthen systematic techniques)
- D. Test of the interfaces between components and of the interactions with different parts of a system.

Correct Answer: B

QUESTION 2

A software company decided to buy a commercial application for its accounting operations. As part of the evaluation process, the company decided to assemble a team to test a number of candidate applications.

Which team would be the most suitable for this goal?

- A. A team from an outsourcing company which specializes in testing accounting software
- B. A team with a mix of software testers and experts from the accounting department
- C. A team of users from the accounting department that will need to use the application on daily basis
- D. A team from the company's testing team, due to their experience in testing software

Correct Answer: B

QUESTION 3

Which of the following are 'Exit Criteria'?

- A. Acceptance criteria, completion criteria, pass/fail criteria.
- B. Coverage of code, schedule, estimates of defect density.
- C. The last executable statement within a component.
- D. Cost overruns.

Correct Answer: B

QUESTION 4

Which of the following options BEST explain the pesticide paradox principle of testing?

- A. If we do not regularly review and revise our tests, we\\ll stop finding defects
- B. Repeatedly running a set of tests will ensure that a system is defect free
- C. Defects are, paradoxically, often contained in a small number of modules
- D. Testing, like spraying pesticide, is an effective bug / defect removal activity

Correct Answer: C

QUESTION 5

Which one of the following statements about testing techniques is TRUE?

- A. Exploratory testing can replace black box techniques when testing time is very limited
- B. Test execution scheduling should give priority to experienced based testing
- C. Specification based techniques can be used as a substitute for a poorly defined test basis
- D. Experienced based techniques are systematic and produce detailed test documentation

Correct Answer: A
