QUESTION 1

When a firewall takes an incoming request for a specific IP address and redirects it to an internal host, which of the following is being used?

A. NIS

B. PAT

C. NAT

D. NIC

Correct Answer: C

QUESTION 2

An administrator is implementing a private cloud that will be used as a test environment. To limit the number of guests per subnet to a maximum of 14, the administrator implemented a /20 network. Which of the following should the administrator use to assign the networks?

A. DHCP

B. Subnet

C. VLAN

D. Gateway

Correct Answer: A

QUESTION 3

A new version of an e-commerce application was deployed using a standard template configuration of 4 vCPU and 8GB of RAM. The administrator has configured the application to automatically add 4 GB of RAM after 80% utilization of continuous use over a period of time.

Which of the following testing techniques should be used to test this scenario?

A. Integration testing

B. Load testing

C. Penetration testing

D. Automation testing

Correct Answer: B

QUESTION 4

A firm responsible for ticket sales notices its local web servers are unable to handle the traffic, which often causes timeout errors and results in lost revenue. The firm wants to obtain additional cloud-based server resources only during peak times. Due to budget constraints, the firm wants to purchase only the exact amount required during peak times. Which of the following steps should be performed to BEST meet the budget requirement?

A. Collect all web server specifications and purchase double the amount of resources from the CSP.

B. Analyze web server performance trends to determine what is being used.

C. Implement cloud bursting through CSP for web servers.

D. Run a network analyzer to monitor web server traffic to determine peak traffic times.

Correct Answer: C

QUESTION 5

Ann, a technician, is using a saved workflow to deploy virtual servers. The script worked yesterday but is now returning an authentication error. Ann confirms that she can manually log in with her own account and create a virtual server. Which of the following is MOST likely causing the error?

A. Certificate misconfiguration

B. Account expiration

C. Federation issues

D. Encryption issues

Correct Answer: C
