QUESTION 3

A vendor is installing a new retail store management application for a customer. The application license ensures software costs are low when the application is not being used, but costs go up when use is higher. Which of the following licensing models is MOST likely being used?

- A. Socket-based
- B. Core-based
- C. Subscription
- D. Volume-based

Correct Answer: A

QUESTION 4

A cloud administrator is designing a multiregion network within an IaaS provider. The business requirements for configuring the network are as follows:

1.

Use private networking in and between the multisites for data replication.

2.

Use low latency to avoid performance issues.

Which of the following solutions should the network administrator use within the IaaS provider to connect multiregions?

A. Peering

B. Gateways

C. VPN

D. Hub and spoke

Correct Answer: C

QUESTION 5

An organization is implementing a new requirement to facilitate users with faster downloads of corporate application content. At the same time, the organization is also expanding cloud regions. Which of the following would be suitable to optimize the network for this requirement?

A. Implement CDN for overall cloud application

B. Implement auto-scaling of the compute resources

C. Implement SR-IOV on the server instances

D. Implement an application container solution

Correct Answer: C
