**QUESTION 4**

During a validation site survey, you realize that the installers mounted some of the APs above the ceiling. They said that this was a request from the building architect due to aesthetics constraints. During the requirements gathering, you weren't advised about any aesthetics constraints from the main stakeholder of the project. What should you do in this case?

- A. Advise the stakeholder that WLAN performance requirements will not be met and a new design process will be needed to meet the requirements.
- B. Leave it as it is and allow automatic channel management to correct any issues.
- C. Increase the output power on all APs by 6 dB immediately.
- D. Remove all external antennas and use only the internal antennas to reduce multipath.

Correct Answer: A
