**QUESTION 1**

You are troubleshooting a problem with interference from a non-802.11 device. Given that the device is not a WLAN device, you cannot use a protocol analyzer and have chosen to use a spectrum analyzer. You want to view the signal from the interfering device over time to see the activity that is generating.

What common spectrum analyzer view should you use for this analysis?

- A. Waterfall/Spectrogram
- B. Real-time FFT
- C. APs
- D. Clients

Correct Answer: A

QUESTION 2

What statement about 802.11 WLAN performance is true?

- A. In modem networks, both centralized and distributed data forwarding work well for most standard office deployments
- B. In most WLANs, no special skill or tuning is required to get peak performance
- C. WLANs perform better as more wireless clients connect with each AP
- D. To get the best performance out of an AP, you should disable data rates of 72 Mbps and lower

Correct Answer: D

QUESTION 3

You are reporting on the RF environment in your facility. The manager asks you to describe the noise floor noted in the report. Which of the following is the best explanation?

- A. The energy radiated by flooring materials that causes interference in the 2.4 GHz and 5 GHz bands.
- B. The noise caused by elevators, microwave ovens, and video transmitters.
- C. The RF energy that exists in the environment from intentional and unintentional RF radiators that forms the baseline above which the intentional signal of your WLAN must exist.
- D. The extra energy radiated by access points and client devices beyond that intended for the signal.

Correct Answer: B

**QUESTION 4**

A client complains of low data rates on his computer. When you evaluate the situation, you see that the signal strength is -84 dBm and the noise floor is -96 dBm. The client is an 802.11ac client and connects to an 802.11acAP. Both the client and AP are 2x2:2 devices. What is the likely cause of the low data rate issue?

- A. Weak signal strength
- B. Too few spatial streams
- C. Lack of support 802.11n
- D. CAT5e cabling run to the AP

Correct Answer: A

QUESTION 5

You are tasked with performing a throughput test on the WLAN. The manager asks that you use open source tools to reduce costs. What open source tool is designed to perform a throughput test?

- A. IxChariot
- B. Python
- C. PuTTY
- D. iPerf

Correct Answer: D
