**QUESTION 1**

You administer a small WLAN with nine access point. As a small business, you do not run a RADIUS server and use WPA2-Personal for security. Recently, you changed the passphrase for WPA2-personal in all Aps and clients. Several users are now reporting the inability to connect to the network at time and it is constrained to one area of the building. When using scanner, you see that the AP covering that area is online

- A. The AP that covers the problem area requires a firmware update
- B. The clients are improperly configured
- C. The AP that covers the problem area has failed
- D. The AP that covers the problem area is improperly configured

Correct Answer: A

QUESTION 2

In which plane of the three networking planes is an access point configured by a WLAN controller?

- A. Control
- B. Management
- C. Security
- D. Data

Correct Answer: B
