**QUESTION 1**

Universal Containers (UC) provides shipping services to its customers. They use Opportunities to track customer shipments. At any given time, shipping status can be one of the 10 values. UC has 200,000 Opportunity records. When creating a new field to track shipping status on opportunity, what should the architect do to improve data quality and avoid data skew?

- A. Create a picklist field, values sorted alphabetically.
- B. Create a Master -Detail to custom object ShippingStatus c.
- C. Create a Lookup to custom object ShippingStatus c.
- D. Create a text field and make it an external ID.

Correct Answer: A

---

**QUESTION 2**

Universal Containers keeps its Account data in Salesforce and its Invoice data in a third - party ERP system. They have connected the Invoice data through a Salesforce external object. They want data from both Accounts and Invoices visible in one report in one place. What two approaches should an architect suggest for achieving this solution? Choose 2 answers

- A. Create a report in an external system combining Salesforce Account data and Invoice data from the ERP.
- B. Create a report combining data from the Account standard object and the Invoices external object.
- C. Create a Visualforce page combining Salesforce Account data and Invoice external object data.
- D. Create a separate Salesforce report for Accounts and Invoices and combine them in a dashboard.

Correct Answer: AC

---

**QUESTION 3**

NTO has multiple systems across its enterprise landscape including salesforce, with disparate version the customer records.

In salesforce, the customer is represented by the contact object.

NTO utilizes an MDM solution with these attributes:

- 1.The MDM solution keeps track of customer master with a master key.
- 2.The master key is a map to the record ID\\s from each external system that customer data is stored within.
- 3.The MDM solution provides de-duplication features, so it acts as the single source of truth.

How should a data architect implement the storage of master key within salesforce?

- A. Store the master key in Heroku postgres and use Heroku connect for synchronization.
- B. Create a custom object to store the master key with a lookup field to contact.
- C. Create an external object to store the master key with a lookup field to contact.
- D. Store the master key on the contact object as an external ID (Field for referential imports)

Correct Answer: D

---

#### QUESTION 4

Universal Containers is setting up an external Business Intelligence (BI) system and wants to extract 1,000,000 Contact records. What should be recommended to avoid timeouts during the export process?

- A. Use the SOAP API to export data.
- B. Utilize the Bulk API to export the data.
- C. Use GZIP compression to export the data.
- D. Schedule a Batch Apex job to export the data.

Correct Answer: C

---

#### QUESTION 5

An Architect needs information about who is creating, changing, or deleting certain fields within the past four months. How can the Architect access this information?

- A. Create a field history report for the fields in question.
- B. After exporting the setup audit trail, find the fields in question.
- C. After exporting the metadata, search it for the fields in question.
- D. Remove "customize application" permissions from everyone else.

Correct Answer: B
