**QUESTION 1**

North Trail Outfitters (NTD) is in the process of evaluating big objects to store large amounts of asset data from an external system. NTO will need to report on this asset data weekly. Which two native tools should a data architect recommend to achieve this reporting requirement?

- A. Standard reports and dashboards
- B. Async SOQL with a custom object
- C. Standard SOQL queries
- D. Einstein Analytics

Correct Answer: BD

QUESTION 2

Universal Container (US) is replacing a home grown CRM solution with Salesforce, UC has decided to migrate operational (Open and active) records to Salesforce, while keeping historical records in legacy system, UC would like historical records to be available in Salesforce on an as needed basis.

Which solution should a data architect recommend to meet business requirement?

- A. Leverage real-time integration to pull records into Salesforce.
- B. Bring all data Salesforce, and delete it after a year.
- C. Leverage mashup to display historical records in Salesforce.
- D. Build a chair solution to go the legacy system and display records.

Correct Answer: C

QUESTION 3

Universal Container (UC) has around 200,000 Customers (stored in Account object). They get 1 or 2 Orders every month from each Customer. Orders are stored in a custom object called "Order c"; this has about 50 fields. UC is expecting a growth of 10% year -over -year. What are two considerations an architect should consider to improve the performance of SOQL queries that retrieve data from the Order _c object? Choose 2 answers

- A. Use SOQL queries without WHERE conditions.
- B. Work with Salesforce Support to enable Skinny Tables.
- C. Reduce the number of triggers on Order _c object.
- D. Make the queries more selective using indexed fields.

Correct Answer: BD

QUESTION 4

Universal Container require all customers to provide either a phone number of an email address when registering for an account.

What should the data architect use to ensure this requirement is met?

- A. validation Rule
- B. required Fields
- C. Apex Class
- D. Process Builder

Correct Answer: A

QUESTION 5

Two million Opportunities need to be loaded in different batches into Salesforce using the Bulk API in parallel mode. What should an Architect consider when loading the Opportunity records?

- A. Use the Name field values to sort batches.
- B. Order batches by Auto-number field.
- C. Create indexes on Opportunity object text fields.
- D. Group batches by the AccountId field.

Correct Answer: D
