**QUESTION 1**

A cloud design includes a software-defined network controller. Which requirement(s) will this address?

- A. Elastically expand applications programmatically into the public cloud
- B. Deploy applications that can programmatically modify zones and deploy LUNs in a SAN
- C. Programmatically abstract network data for optimal performance in a low bandwidth infrastructure
- D. Deploy applications that can programmatically alter network behavior.

Correct Answer: C

---

**QUESTION 2**

Which services are typically offered by cloud service providers?

- A. Bundled storage, applications, operating systems
- B. Operating environment, virtualization, applications
- C. Software, platform, infrastructure
- D. Compute, storage, connectivity

Correct Answer: C

---

**QUESTION 3**

An organization wants to have showback capability in their private cloud. Which cloud management platform component should be included in the cloud design to support this requirement?

- A. SSO
- B. Service catalog
- C. Metering application
- D. Monitoring application

Correct Answer: C

Note: IT chargeback is an accounting strategy that applies the costs of IT hardware, software, cloud services or shared services to the business unit in which they are used. IT showback is similar to IT chargeback, but the prices are for informational purposes only and no one is billed.

#### QUESTION 4

An organization wants to provide its developers the ability to deploy VMs. These VMs have software and libraries installed that are used to develop applications. Each VM will be configured with the same IP address and will be able to download application code from a central server. What will be included in the design to support these requirements?

- A. VXLANs and an OS firewall
- B. VXLANs and virtual firewall appliances
- C. VLANs and virtual IDS appliances
- D. VSANs and virtual IDS appliances

Correct Answer: B

#### QUESTION 5

DRAG DROP

Match each platform requirement to its respective definition.

Select and Place:

CHARACTERISTIC:	REQUIREMENT:
Simplifies application development	Consolidated Technology Stack
Supports multiple programming languages and frameworks	Scalability
Focuses on rapid product delivery and QA	Microservice Support
Ensures optimal end-user service and utilization	Agile development and DevOps

Correct Answer:

**CHARACTERISTIC:**

**REQUIREMENT:**

<b>Supports multiple programming languages and frameworks</b>
<b>Focuses on rapid product delivery and QA</b>
<b>Ensures optimal end-user service and utilization</b>
<b>Simplifies application development</b>
