QUESTION 2

An administrator recognizes poor network performance when using CIFS shares from a PowerProtect DD system. The network link utilization is under 100%.

What is the most likely cause of this issue?

- A. TCP window size too small
- B. TCP timeout too small
- C. TCP timeout too large
- D. TCP window size too large

Correct Answer: B

QUESTION 3

An engineer is configuring a PowerProtect DD system for VTL using Fibre Channel. How should the zones be configured?

- A. Hard zones
- B. Single initiator, multi target
- C. Single initiator, single target
- D. Soft zones

Correct Answer: B

**QUESTION 4**

An administrator has retained snapshots for a single MTree and is trying to create a new one. An error message is received. What is the reason for the failure?

- A. The maximum number of snapshots has been exceeded
- B. The user does not have the permission to retain more snapshots
- C. There are not enough snapshot licenses
- D. The DDOS needs to be upgraded

Correct Answer: A

QUESTION 5

When the PowerProtect DD system boots up for the first time, the CLI configuration wizard script does not start automatically.

Which command can be used to start the script manually?

- A. configure terminal
- B. config setup
- C. setup config
- D. config wizard

Correct Answer: B
