QUESTION 1

A backup administrator wants to verify that quotas have been enabled on a PowerProtect DD appliance. Which command is used to verify that quotas are being enforced?

- A. mtree show quota
- B. quota capacity status
- C. quota capacity reset
- D. quota capacity se

Correct Answer: D

Reference: <https://www.dell.com/support/kbdoc/en-pk/000055400/data-domain-evt-quota-00001-mtree-quota-soft-limit-reached>

QUESTION 2

What information does the daily Autosupport report contain?

- A. Quota alerts and MTree capacity
- B. System and Quota alerts
- C. System and MTree capacity
- D. MTree capacity and System alerts

Correct Answer: B

Explanation:

The autosupport command manages system reports. Command options enable administrative users to manage two reports that describe the state of a Data Domain system: the autosupport report and the daily alert summary.

QUESTION 3

An administrator has retained snapshots for a single MTree and is trying to create a new one. An error message is received. What is the reason for the failure?

- A. The maximum number of snapshots has been exceeded
- B. The DDOS needs to be upgraded
- C. The user does not have the permission to retain more snapshots
- D. There are not enough snapshot licenses

Correct Answer: A

Explanation: The maximum number of snapshots allowed per MTree is 750. Warnings are sent when the number of snapshots per MTree reaches 90% of the maximum allowed number (from 675 to 749 snapshots), and an alert is generated

when the maximum number is reached. To clear the warning, expire snapshots and then run the file system cleaning operation.

Note: To identify an MTree that is nearing the maximum number of snapshots, check the Snapshots panel of the MTree page regarding viewing MTree snapshot information.

QUESTION 4

What are some possible network bottlenecks for a PowerProtect DD?

- A. Configuration, wire speeds, switches and routers
- B. Connectivity, firewalls, and routing protocols
- C. Connectivity, routing protocols, and configuration
- D. Routing protocols, switches and routers, and wire speeds

Correct Answer: A

QUESTION 5

What are all the protocols that can be used to send data to a PowerProtect DD over Ethernet?

- A. NDMP, NFS, VTL, and CIFS
- B. DD Boost, VTL, CIFS, and NFS
- C. CIFS, NFS, DD Boost, and NDMP
- D. VTL, NFS, and NDMP

Correct Answer: B

Explanation:

DD series can simultaneously support multiple access methods including NFS and/or CIFS, VTL, NDMP and DD Boost
