### QUESTION 1

Which component executes the read/write requests in a backup environment consisting of a PowerProtect DD appliance and IBM Spectrum Protect?

- A. Media Server
- B. Media Agent
- C. Spectrum Protect Server
- D. Master Server

Correct Answer: B

---

### QUESTION 2

What information does the daily Autosupport report contain?

- A. Quota alerts and MTree capacity
- B. System and Quota alerts
- C. System and MTree capacity
- D. MTree capacity and System alerts

Correct Answer: B

Explanation:

The autosupport command manages system reports. Command options enable administrative users to manage two reports that describe the state of a Data Domain system: the autosupport report and the daily alert summary.

### QUESTION 3

What is the preferred method to ensure backups are protected against deletion or corruption?

- A. Dell EMC Cloud Tier
- B. Encryption
- C. Retention Lock
- D. Data Invulnerability Architecture

Correct Answer: A

**Explanation:**

In order to keep data protection tools from getting overwhelmed by the enormous capacity requirements generated in today's data centers, technologies which enable data to be tiered from primary backup to secondary long term retention/

archive are becoming more attractive. Dell EMC Cloud Tier technology integrates with an Dell EMC ECS Object Storage system (on premises or hosted private cloud) to provide a massively scalable architecture. By leveraging the capabilities

of both of these platforms, IT administrators and architects can continue the path of consolidating critical backup processes, protecting complex environments mixed with unstructured data, database engines, virtual environments, while at the

same time providing the ability to meet long term.
