QUESTION 1

Universal Containers (UC) is considering updating their Salesforce Release Management process. Which three best
practices should UC consider for Version Control? Choose 3 answers

A. Maintain separate developer branches for minor and major releases.

B. Automation is a must with various application branches in the repository.

C. Maintain unrestrictedaccess to the release sandboxes for all changes being deployed.

D. Maintain a single repository for application with individual branches for projects.

E. Maintain a single entry point for production from the master branch.

Correct Answer: ADE

QUESTION 2

Universal containers is looking to install a new application to enable advanced quoting in its current Professional Edition
org. The org is near capacity with object and tab limits. Which two solutions should the Architect recommend? Choose 2
answers

A. Install an Aloha certified App

B. Upgrade to an Enterprise Edition org

C. Create and install an unmanaged package

D. Buy more user licenses to increase org limits

Correct Answer: BD

QUESTION 3

Universal Containers (UC) is looking at implementing a large number of features using an AppExchange product. This
product uses Sobjects to store and configure important business logic within the application. Which two options should
an architect recommend, as the source of truth for storing this reference data? Choose 2 answers

A. Store the records in sandboxes and production.

B. Store the records in a version control system.

C. Use a third-party product to manage these records.

D. Attach CSV files to the user stories in a project management system.

Correct Answer: AC

QUESTION 4

Universal Containers requires that all sandboxes that have not been recently refreshed must also receive the newest changes to production. This must be done before any functionality from that environment can be moved to production. Which deployment tool would allow this deployment process to be managed in an automated fashion?

A. Workbench

B. Force.com Migration Tool

C. Change Sets

D. Force.com IDE

Correct Answer: B

QUESTION 5

Universal Containers is building a custom application on the Force.com platform. There is a budget and release date that has been set by the board of directors, but the application must meet the requirements that will be submitted and voted on by a public user community. What is the risk associated with the scenario?

A. The requirements should not be solicited by an external community

B. The project is not using the Waterfall methodology

C. The project is not using an Agile methodology

D. The requirements are unknown and the release date has been set.

Correct Answer: D
