QUESTION 1

Cloud computing advances have partly enabled DevOps practices.

Which cloud technology characteristic or characteristics enable DevOps most?

- A. Broad network access ensures that both Development and Operations can access the code easily
- B. Cloud computing is in the basis completely script-based, which means the environment is easy to automate
- C. Resource pooling and rapid elasticity make cloud computing cheaper, so that resources can go to development

Correct Answer: C

QUESTION 2

Why is reducing the fragility of a business system difficult?

- A. Because doing so will disrupt the current product and service timelines
- B. Because doing so will increase the number of incidents that occur temporarily
- C. Because it is difficult to deliberately introduce chaos into the Production environment
- D. Because of the high risks of business disruption when integrating large numbers of systems

Correct Answer: D
