#### QUESTION 1

Which technique is used in Kerberos to authenticate a client-server application across an insecure network?

- A. Secret-key cryptography
- B. One-way hash function
- C. Shared secret
- D. Open ID control

Correct Answer: A

---

#### QUESTION 2

What is an accurate statement about the Network File System (NFS) protocol?

- A. Provides a set of remote procedure calls to access a remote file system
- B. Uses the server message block protocol to provide file locking capability
- C. Translates block I/O requests from a file system into object-level requests
- D. Automatically scales the file systems on clients as the workload increases

Correct Answer: A

---

#### QUESTION 3

What is an accurate statement about Software as a Service?

- A. Consumer has limited control over user-specific application configuration settings
- B. Consumer has control over the operating systems and deployed applications
- C. Consumer has control over the configuration settings of the application-hosting environment
- D. Consumer has limited control over select networking components, such as host firewalls

Correct Answer: A

---

#### QUESTION 4

What is an accurate statement about VLANs and VSANs in an FCoE environment with an existing FC SAN?

- A. A dedicated VLAN must be configured for each VSAN
- B. VLANs configured for VSANs must carry regular LAN traffic

- C. Default VLAN must map to all VSANs defined in the FCoE switch
- D. A minimum of four VLANs must be created to isolate VSAN traffic

Correct Answer: A

---

#### QUESTION 5

What accurately describes a VSAN?

- A. A logical fabric on an FC SAN that enables communication among a group of nodes
- B. A logical fabric on an FC SAN that has a 1-to-1 relationship with a zone in the FC SAN
- C. A logical fabric across FC SANs that aggregates the FC SANs to create a network pool
- D. A logical fabric across FC SANs that allows non-disruptive file mobility between the SANs

Correct Answer: A
