QUESTION 1

What is an accurate statement about an active/active service availability zone configuration?

- A. It provides a lower recovery time objective (RTO).
- B. The zones must be connected over a FC network.
- C. The zones must be located more than 200 km apart.
- D. It has reduced bandwidth requirements for replication across zones.

Correct Answer: A

QUESTION 2

What is a characteristic of cloud service management?

- A. Adopting automation and workflow orchestration
- B. Enabling IT asset-specific management
- C. Separating management processes from service design
- D. Abstracting cloud service requirements and SLA

Correct Answer: A

QUESTION 3

What describes the operation of the write-through cache in a block-based storage system?

- A. Data is placed in the cache. Data is written to the disk. An acknowledgement for the write is sent.
- B. Data is placed in the cache. An acknowledgement for the write is sent immediately. Data is later written to the disk.
- C. Data is written directly to the disk without being placed in the cache. An acknowledgement for the write is sent.
- D. Data is written directly to the disk. An acknowledgement for the write is sent immediately. Data is later placed in the cache.

Correct Answer: A

QUESTION 4

An organization wants to leverage the infrastructure resources in their existing data center and transform it to a cloud infrastructure.

Which type of deployment is suitable for this transformation?

- A. Brownfield
- B. Private cloud
- C. Public cloud
- D. Greenfield

Correct Answer: A

QUESTION 5

What is an OpenID mechanism?

- A. An open standard for authentication in which a service provider uses authentication services from an identity provider
- B. An open authorization mechanism that allows a client to access protected resources from a resource server on behalf of a resource owner
- C. A network authentication protocol that provides strong authentication for client/server applications by using secret-key cryptography
- D. A mechanism that examines data packets traversing a network and compares them to a set of filtering rules

Correct Answer: A
