**QUESTION 1**

A company moved to a new building that contains a fully virtualized data center. They purchased a building 10 km away and decide to build a second data center at that location. The new data center will be identical to the first, and applications and services will be mobile between the locations.

Which WAN connectivity option would provide both the best performance for virtual server mobility across sites?

- A. MPLS
- B. Dark Fiber
- C. IP
- D. WDM

Correct Answer: B

QUESTION 2

Which product performs virtualized data caching across heterogeneous storage arrays?

- A. VMAX
- B. VNX
- C. VPLEX
- D. Atmos

Correct Answer: C

QUESTION 3

Why is a quick risk assessment performed?

- A. It filters high value assets to determine proper placement in a VDC or a cloud.
- B. It is a simple method for assessing exposures in a VDC or a cloud.
- C. It serves as a check and balance against an auditor's report.
- D. It is a governance requirement, conducted for regulatory reasons.

Correct Answer: A

QUESTION 4

Which is an example of vertically scaling a virtual application?

- A. Cluster two database virtual servers on a single physical server
- B. Migrate a database virtual server to a higher-capacity physical server
- C. Migrate a database virtual server to a less-utilized physical server
- D. Cluster two database virtual servers across two physical servers

Correct Answer: B

QUESTION 5

Which solution should be the primary choice for protection against accidental data deletion?

- A. Backup
- B. Local replication
- C. Remote replication
- D. Fault-tolerant cluster with hot standby VM

Correct Answer: A
